1-4018-6026-5
(C) 2005
544 pp, 8 1/2 x 11,
Softcover, 4-Color

The intended audience is any member or aspiring member of the health professions. The authors are credible authorities.

The book provides an introduction to medical terminology and covers the human body in health and disease, the major systems of the human body, and diagnostic procedures and pharmacology in 15 chapters. Learning objectives in each chapter require short written answers to reinforce learning and provide practice in writing and spelling. The CD-ROM StudyWare provides additional interactive practice with quizzes and other learning activities which correlate with book chapters. With "Human Touch: Critical Thinking" scenarios, students are given the opportunity to apply knowledge in real patient situations.

This book has a demonstrated legacy of providing strategies conducive to learning the relevant concepts in this field.
